

D2L Instructor Manual

About Ouriginal's Integration with D2L

Ouriginal can be added to an institutional LMS through an API integration. The integration allows the institutional Admin User(s) access to the Ouriginal tool features through their LMS without having to make changes to the LMS properties. For instance, D2L institution Admin User(s) can add the Ouriginal tool to their Brightspace, making it available to instructors as a pre-configured tool for their courses.

Assignment Creation Instructions

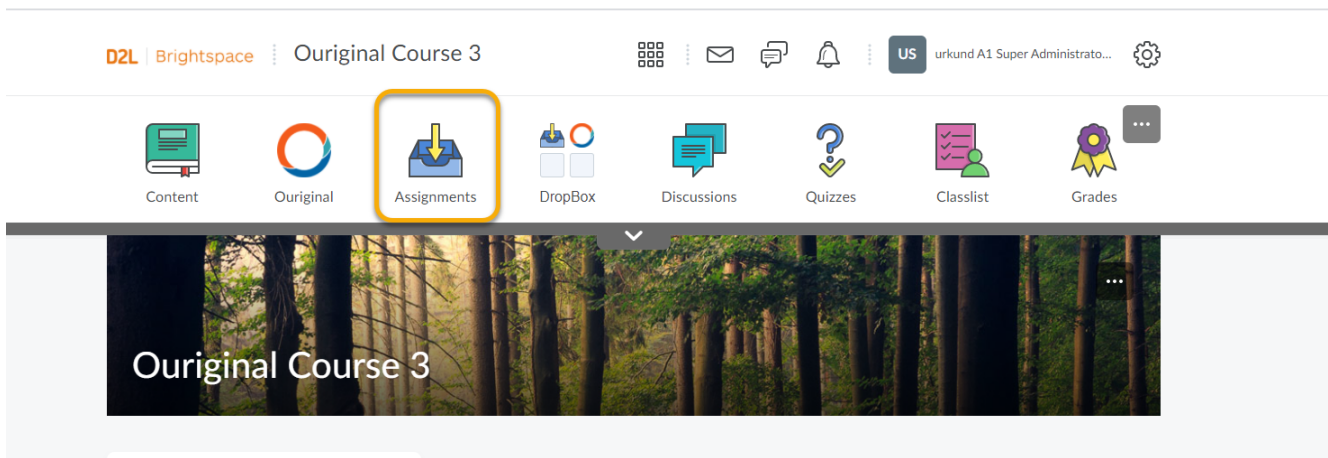

The Ouriginal tool should be added to your course Navbar by your institution's LMS Admin. If you do not see it, please contact them for more assistance.

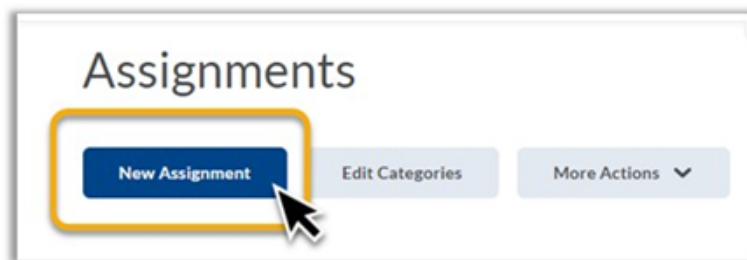

Creating an Assignment with Ouriginal

Creating an assignment with the Ouriginal tool is very simple. Begin by going to your course and selecting the Assignments icon in your Navbar.

In the Assignment page, Select 'New Assignment'.

Now the 'New Assignment' page will appear as it normally would in Brightspace.

There are 3 things you need to review for a new assignment when using the Ouriginal tool:

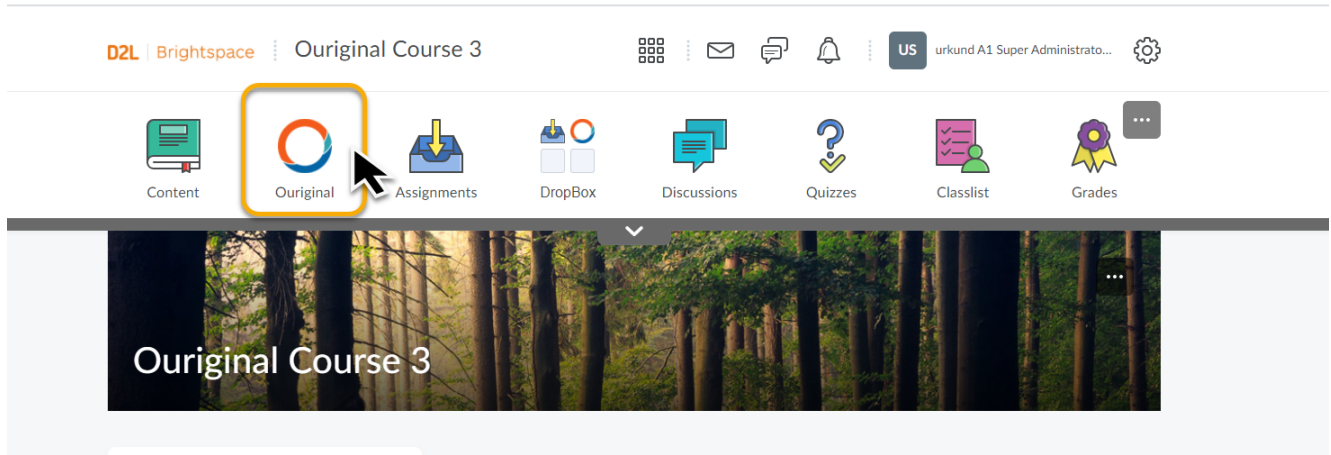

1. Check to verify that 'Submission type' selected is 'File submission'
2. Decide how many 'Files Allowed Per Submission' for the assignment. Best practice is to choose 'Unlimited'. This permits for rough drafts etc.
3. Decide how you want this assignment to store each student's submission. Best practice for this option is to select 'All submissions are kept' – again to allow for rough drafts and encourage discussions between instructor and student.

Once you have finished creating your assignment, remember to select 'Save and Close'.

Turn on the Ouriginal Tool for an Assignment

Open your course and select the 'Ouriginal' link in your Navbar. **Note:** Each institution will choose how the Ouriginal link appears in your Navbar. Be sure to check with your LMS Admin if you cannot find it.

Several page options may appear based on your assigned roles in Brightspace. If you have more than one option, select 'View Instructor Page'.

Introduction to							

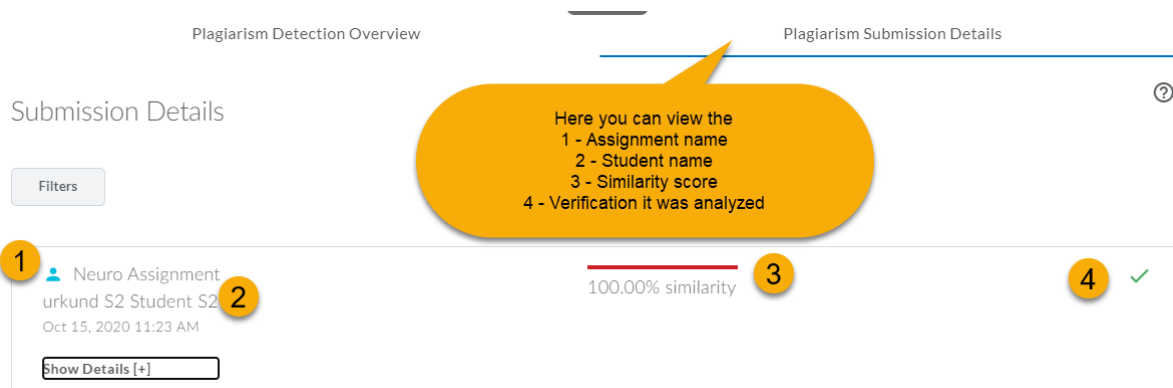

A window will appear asking you to verify your selection.

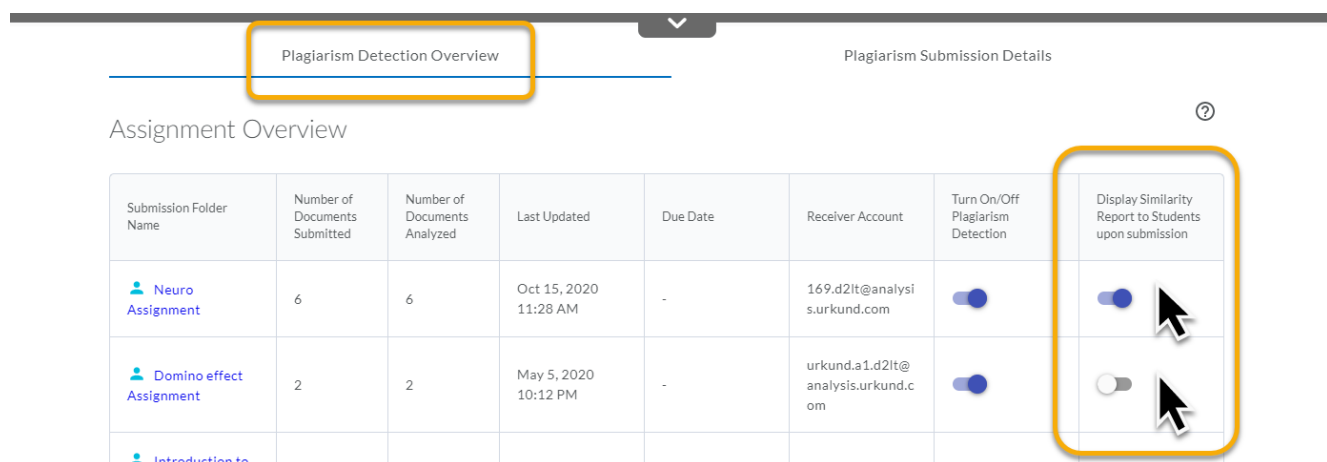

Access to Submission Details

'Plagiarism Submission Details' provides information about Original assignments:

1. Assignment Name
2. Student Name
3. Similarity Score
4. Verification submission was analyzed by Ouriginal

NOTE: In the example above, the 'Neuro' assignment had the 'Display Similarity Report to Students upon submission' feature turned ON.

You can apply a filter to the 'Plagiarism Submission Details' results.
Choose your filter options and then choose 'Apply Filters'.
